

PARK SURVEY

City Council is looking for input from the residents regarding constructing a new city park. Three considerations are being made regarding a new park:

1. What location should the new park be constructed at?
2. What type of park should be built if one is constructed?
3. How much should be spent on a new park if one is constructed?

By completing this survey you will be directly contributing to the decision making process and helping City Council obtain the opinion of their constituents.
