

## **PUBLIC INFORMATION NOTICE**

In order to stay current with Building Code Design Standards, the City of Shenandoah is adopting the 2018 International Codes developed and published by the International Code Council.

We understand that changes can sometimes be difficult. Therefore, we have decided to provide accommodation by allowing for a transition period.

From October 2020 through December 31, 2020 plans and projects can be designed to meet the criteria of either the 2015 or 2018 International Codes.

**As of January 1, 2021 all new building plans and projects must be designed to meet the criteria of the 2018 International Codes.**

By remaining current with modern Building Codes it establishes that construction within the City of Shenandoah will be of the highest quality for our residents, visitors, and business owners.

Thank you,

Danny Svoboda
